2. What is the third quartile of the data set
$\{12, \phi, \beta, 8,10,7, \phi, 8\}$ ?

$$
\begin{array}{cc}
3,5 \| 5, & 6,7,8,110,12 \\
\frac{185}{5} & \text { med } \\
6.5 & 9
\end{array}
$$

4. Given the stem and leaf plot of female ages
shown below, what percent of females were
younger than 20 ?

$\{30,25,11,24,33,29,17\}$
$m, h=11$
1st $0=17$
median $=25$
$3^{\text {rd }} Q=30$
$\max =33$

5. What is theoretical probability? $\rightarrow$ What should happen
A. the ratio of favorable outcomes to possible outcomes
B. the ratio of favorable outcomes to unfavorable outcomes
C. the ratio of successes to total trials
D. the ratio of successes to failed trials
6. What is experimental probability? $\rightarrow$ What did happen
A. the ratio of favorable outcomes to possible outcomes
B. the ratio of favorable outcomes to unfavorable outcomes
C. the ratio of successes to total trials
D. the ratio of successes to failed trials
7. Refer to the figure below. At the carnival, Willie Winn needed to land the ball on the shaded area to get a prize. He played the game 60 times and received 24 prizes. What was Willie Winn's experimental probability and theoretical probability?
A. $\frac{\frac{3}{5} \operatorname{anc} d \frac{5}{7}}{\frac{2}{3} \text { and } \frac{5}{12}}$

8. Minho rolls two dice 100 times. Given the sample space shown below, approximately how many times can Minho expect to roll a sum of eight ${ }^{2}$
A. 5
B. 6
D. 50

| 1,1 | 1,2 | 1,3 | 1,4 | 1,5 | 1,6 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 2,1 | 2,2 | 2,3 | 2,4 | 2,5 | 2,6 |
| 3,1 | 3,2 | 3,3 | 3,4 | 3,5 | 3,6 |
| 4,1 | 4,2 | 4,3 | 4,4 | 4,5 | 4,6 |
| 5,1 | 5,2 | 5,3 | 5,4 | 5,5 | 5,6 |
| 6,1 | 6,2 | 6,3 | 6,4 | 6,5 | 6,6 |

$$
\begin{aligned}
\frac{5}{36} & =\frac{x}{100} \\
\frac{36 x}{x} & =\frac{500}{36} \\
x & =13.9
\end{aligned}
$$

11. Alex has a pink shirt, an orange shirt, and a yellow

$$
\frac{5}{36} \times 100=13.9
$$ shirt. She also has gray pants and blue jeans. Make a sample space to help you answer the following question. If she chooses one shirt and one pair of pants, what is the probability that her outfit will pants/jeans include ar orange shirt or bray pants?

B. $\frac{1}{3}$
D. $\frac{1}{2}$
sample
Space $\rightarrow(\underline{P, G)}(P, B) \underline{(O, G)}(\underline{0, B)}(Y, G)(Y, B)$

12. In algebra class $30 \% \mathrm{f}$ the students are fifteen years old, $60 \%$ are tourteen years old, and $10 \%$ are sixteen years old. 10 students are to be chosen at random to take an exam. How many of the students, chosen at random, would you predict to be fifteen years old?

$$
\begin{aligned}
& 30 \%=.3=\frac{3}{10} \\
& .3 \times 10=3 \\
& \frac{3}{10} \times 10=5
\end{aligned}
$$

14. The following box-and-whisker plot shows the test scores from Mr. Nguyen's class. What percentage of

15. Parachutists jump from an airplane and land in the rectangular field shown. What is the probability that a parachutid avoids the big oak tree represented by the circle inthe diagram? (Assume that the person
is unable to control where the specific landing point

## is within the rectangle.)

200 ft
A. 0.055
A. 0.055
C. 0.788

$$
\text { B. } 0.218
$$

$$
\text { D. } 0.945
$$

$$
\text { Arectingle }=\ln
$$

$$
=(180)(2.00 .)
$$

180 ft

$$
=36,000
$$

$$
\begin{aligned}
\text { Aalck } & =\pi r^{2} \\
& =\pi(25)^{2} \\
& =6251 \pi
\end{aligned}
$$

$$
\begin{array}{r}
h_{1}+\frac{625 \pi}{36,000} \simeq .055=1-.055 \\
=.945
\end{array}
$$

$$
\text { auoid } \frac{36,000-625 \pi}{36,000}=.945
$$
